

Improving Emission Inventories for Effective Air Quality Management Across North America

A NARSTO Assessment

Prepared by:

The NARSTO Emission Inventory Assessment Team

ABOUT THE COVER

The map on the cover of this Assessment shows nitrogen oxide emissions (in tonnes/yr/km²) for Canada, the United States, and Mexico. This map was created using information from national emission inventories compiled by the respective countries. More information about this map and its data sources can be found in Chapter 3 of this Assessment.

NARSTO 05-001

Improving Emission Inventories for Effective Air Quality Management Across North America

A NARSTO Assessment

August 2005
